ABOUT US

Since 2006

Project Management
MG Consult Ltd.

MG Consult Ltd. is a professional Project Management company for Construction-investment projects - one of the few companies in Bulgaria, utilizing the best project management business practices worldwide, applying a top-notch know-how to the market in Bulgaria, serving high-profile international and local investors and partners.

Our team: We utilize full time professionals and experts - all licenesed in engineering & architecture, highly experienced and competent in the Construction Project Management process. Members of our team are certified holders of PMP & PRINCE-2.

Industries: We cover a wide range of investment projects in the construction industry - offices, business parks, industrial and production facilities, residential, logistics, transportation, retail, education facilities, PV and energy plants.

WHAT WE DO

Since 2006

Project Management
MG Consult Ltd.

MG Consult Ltd. provides full range of high-class professional project management services for construction projects. This includes all processes specific to all phases of projects life cycle:

- I. Due Diligence / Pre-planning**
- II. Planning and Scope**
- III. Tendering procedures**
- IV. Implementing the Project Management Plan**
- IV. Monitoring and Controlling the Construction**
- V. Project Closing phase**

Part of our work is to provide well-thought Project Management Plan, serving as the guiding document which lays out to the stakeholders how the project will be managed and executed.

PRO BONO

Since 2006

Project Management
MG Consult Ltd.

When it comes to building/developing a new project, or remodeling an existing project, the pre-design phase and the pre-construction are just as crucial as the construction phase itself. We can provide PRO BONO services in this first phase a.k.a. "Due Diligence / Pre-planning"

In the Construction Management process it is important to perform Due Diligence, which includes some of the following steps:

- 1) Inspection of the project site and the available site documentation;
- 2) Identifying potential issues before they become significant problems to the client / Investor;
- 3) Assessing the established project budget, needs, and expectations for the project, and suggest alternative methods and materials that may be more cost-effective for client's goals.
