

Who are we?

- BULLSOFT Ltd. is an outsourcing IT services company
- Established as a start-up, co-financed by an EU program
- **Mission:** to provide quality and reliable innovative outsourcing IT services in terms of the fast growing digital reality and new business needs and requirements.

Cybersecurity, data recovery and backup

- Reliable and secure cybersecurity solutions for backup and archiving, based on AI provided by Acronis;
- Storage facility in Sofia, that meets the international rules on cybersecurity, business process continuity and compatibility with regulatory requirements;
- Added value for customers – no commitment to maintain and manage the backup infrastructure.

Digitization of a document archive

- Digitization of the archive using a specialized web-based system for storage and management of document archives; no customer's commitment to implement specialized software and infrastructure on their premises;
- Two-factor authentication: users with different rights and access through electronic authentication by Evrotrust qualified electronic signature;
- Unlimited addition and processing of new documents in the digital archive;
- Storage of the digital archive on modern server systems, owned by Bullsoft;
- Providing additional back-up of the client's archive and administration.

GDPR, NIS2: Personal data protection and information security outsourcing services

- Provide to customers innovative web-based application as a service that helps companies and organizations meet the legal requirements related to GDPR, ISO 27001, ISO 22301, NIS;
- Scope of the service: GAP analysis and assessment of the current level of compliance of the organization with the requirements of GDPR, prepared by professionals with experience in the field;
- Rules and procedures introduced in your company to meet the requirements of GDRP;
- Monitoring of GDPR compliance: processing and maintenance of registers, policies, records and documents;

GDPR, NIS2: Personal data protection and information security outsourcing services

- Integrated solutions combining GDPR and the international standards: ISO27001: 2013, ISO 22301;
- Data encryption;
- Personal Data Protection Officer;
- Compatibility with regulatory requirements.

Business analysis under EU funded programs

- Preparation of business analysis on financial and non-financial parameters regarding the capacity of your company for application, approval and successful implementation of projects under the Operational Programs of Bulgaria, co-financed by European funds, National Recovery and Sustainability Plan and other EU programs;
- Profound experience and expertise on preparation and management of EU funded projects

How to guarantee the quality of outsourcing services?
